

CANVAS

1. CHARACTERISTICS OF THE STUDY POPULATION:

- Medical record:

- Age :

- Family History :

- Gastric cancer
- Colorectal cancer
- Cancer of the uterus cervix
- Endometrial cancer
- Ovarian cancer
- Breast cancer
- Others

Specify :

- Personal History:

- ✓ Habits :

- Tobacco
- others :

- ✓ Medical history :

- Diabetes
- Hypertension
- Obesity (BMI =

- Dysthyroid
- PCOS
- Other :

✓ **Surgical history:**

- Gastrectomy
- Colectomy
- Appendicectomy
- Cholecystectomy
- Other

✓ **Gynaecological history:**

- Gravidity:
- Parity:
- Menarche :
- Contraception: No Oral contraceptive use Intrauterine device progestin
 tubal ligation
- Hormonal replacement therapy:
- Infertility: No Primary Secondary
- Pap smear: No
Yes
- Colposcopy
- Fibroids

○ Previous uterine endoscopic procedure: Myomectomy Polypectomy

hemostatic curettage

Other :

○ Ovarian cyst: No

Yes specify:

○ Mammogram: No

Yes

Result:

○ Breast neoplasia: No

Yes specify.....

○ Tamoxifen

○ Other:

○ Previous pelvic irradiation

2. CLINICAL CHARACTERISTICS OF ABNORMAL UTERINE BLEEDING (SUA)

• Delay between the start of the SUA and the consultation:

• AUS Abundance:

○ minimes

○ of average abundance

○ abundant

• AUS Type:

○ Metrorrhagias

○ Menorrhagia

○ Number of hemorrhage episodes: 1 2 3

○ Associated functional signs:

Pelvic pain Leucorrhea abdominal mass Hydrorrhea Pyorrhea

Fatigue Weight loss anorexia

Other

3. **Complementary examination:**

- **Pelvic ultrasound:**

- Uterine size: Normal increased

- Endometrial thickness (mm):

- Vascularization Doppler score: 1 2 3

- Endometrial–myometrial interface:

- Intracavitary image: no Yes , specify:.....

- Other:

- **Biology:** Hemoglobin =.....g/dl

- **Exploration of the uterin cavity :**

- Hysteroscopy and biopsy :

- hemostatic curettage:

- Quantity of curettage specimen : Scanty abundant

- **Time of the biopsy sample compared to the beginning of the symptomatology:**

.....

- **Diagnosis at the biopsy:**

4. **DEFINITIVE HISTOLOGICAL RESULTS:**.....

- **Delay between the preoperative diagnosis and the hysterectomy:**
